PROFILE

Developer and data analyst with a multidisciplinary background spanning technology, engineering, business operations and retail leadership. I build responsive web experiences, Python applications and data analysis projects using tools including HTML, CSS, JavaScript, Python, SQL, Excel and Power BI. I bring a practical, structured approach to problem solving, supported by strong communication, organisation and customer insight.

SELECTED TECHNICAL PROJECTS

MEHEK Retail Sales Analysis

Data Analytics · Excel · SQL · Power BI · DAX

End-to-end analysis of 2025 retail transactions: data cleaning, KPI definition, SQL validation and an interactive Power BI dashboard. Identified £59.9K total revenue, London as the strongest store and Fragrance as the leading category.

MEHEK E-commerce Website

Web Development · HTML · CSS · JavaScript

Responsive multi-page fragrance e-commerce website built from scratch without frameworks, including product navigation, filters, cart behaviour and brand storytelling.

Staff Management System

Python & Applications · Python · Flask · SQLite

Workforce management web application for employees, availability, rota planning and role-based workflows. Built as an expandable portfolio system with database-backed functionality.

AWS Cloud Network Design

Cloud & Cybersecurity · AWS · VPC · Networking

Secure and scalable AWS network design using VPCs, subnets, routing, security groups, NAT/Internet access and monitoring concepts.

TECHNICAL SKILLS

Development
